

ABSTRACT OF THE DISCLOSURE

There is provided a mounting method of a display panel of a number of kinds which is different in one or all of shape, thickness, size, or like, installed in an information processing apparatus such as a notebook personal computer, on a common display panel housing. It is possible to employ and mount various kinds of display panels without changing the display panel housing by means of using a common panel-mounting case, a common display cover, and a combination of first spacers, second spacers, and holding members.
